### **DETAILED ACTION**

This office action is in response to the election of Group I, namely claims 1-15, on October 21, 2004. Claims 1-15 are currently pending examination.

This application is a continuation of PCT/EP02/05491, filed May 17, 2002, which in turn claims priority of German Application No. 101 24 370.7, filed May 18, 2001.

#### Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 16-22, which have been non-elected without traverse. Accordingly, claims 16-22 have been canceled.

#### **Priority**

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

# Information Disclosure Statement

3. The prior art documents submitted by Applicant in the Information Disclosure Statements filed on November 18, 2003, have been considered and made of record (note attached copy of forms PTO-1449).

# Allowable Subject Matter

4. Claims 1-15 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest the specific limitation of the claimed device, "a microscopic gap which results from applying, while in the liquid state, one of said base body and said at least one cover body to the other while in the liquid state". The closest prior art of record (U.S.P. No. 6,092,904 to Tai et al.) teaches all of the claimed limitations minus the formation of the gap during the application of the optical elements

in the liquid state, for further applications. Some of the relevant prior art teaches liquid crystal material filling a gap, but does not teach that the gap resulted from the specific application in a liquid state, and subsequently the gap was formed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

# Inventorship

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

#### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, with respect to the state of the art of optical illumination devices having gaps and/or prism material properties: PTO-892 form references A-C.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J Petkovsek whose telephone number is (571) 272-2355. The examiner can normally be reached on M-F 8:30-5:00.

Application/Control Number: 10/714,874 Page 4

Art Unit: 2874

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rodney Bovernick can be reached on (571) 272-2344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
